STAY OVER ARRIVALS

Following the 4.5% growth in arrivals during 2012 (78,965) there was a 0.9% decline in stay over visitation in 2013. The reported 78,277 arrivals, was impacted by declines from key source markets including the United States, French West Indies, United Kingdom, and Canada.

The French West Indies continues to be the largest source market despite a 2.8% decline in arrivals. At 22,373 at the end of 2013, the **French West Indies represented 28.6% of total stay over arrivals and 53.9% of regional arrivals**. While arrivals from North America – US (18,049) and Canada (3,018), declined 5% and 1.5%, respectively, **there was overall growth in European arrivals by 5.7% to 13,552**. Some key growth markets out of Europe were France (4,584) – 9.5%, Germany (1,499) – 7.3%, and Sweden (343) – 4.9%. The 2013 arrivals from France was the highest recorded visitation from the mainland since 2009 (4,469). Visitation from Germany continues to grow steadily as well as those from Sweden and most of the Scandinavian countries. The possibilities of better access connections in 2014 will present avenues to allow Dominica to capitalize on the interest coming from these European markets in the wake reducing arrivals from the UK.

Negative growth in both the 2nd and 3rd quarters greatly influenced the end of year performance. **However, a 23% growth in October (8,982) and a 4.8% growth in December (7,535) contributed to the 9.1% overall 4th quarter growth which helped close the 4.1% decline which was reported**

through September 2013.

Stay over visits for **vacation and business (business and meeting) were relatively flat** and travellers visiting friends and relatives grew 11.4% (8,701). Arrivals for study declined 13.1% (4,189), however student enrolment at the Off-Shore Medical Schools remained stable, an indication that the students may not have made as many trips off island as in previous years. **As destination weddings and romance gain greater notoriety it is important to note there was a 31.9% (682) growth in the number of visitor arrivals recorded with weddings and honeymoons as their primary reason for visiting Dominica.**

Visitors staying specifically in guest houses and inns declined, 1.4% and 20.5% respectively, however Hotels (3.6%), Lodges (31.4%), B&Bs (49.8%), and Apartments/Cottages (18.2%) recorded increased numbers. There was a 2.7% decline in visitors staying at private homes.

Recognizing the growth markets among existing target markets and the “non-traditional” targets as well as the development of campaigns to attract increased arrivals are among the efforts to be undertaken in 2014 and beyond. Packages and promotions around festivals and major holidays will help raise our peak periods, while niche market development capitalizing on the trough periods will contribute to driving growth towards our targets.

CRUISE

Like in 2012, the lack of arrivals between May and September 2013 coupled with few calls during the “cruise peak season” resulted in a 12.4% decline in cruise calls to 162 from 185 in 2012. Passenger arrivals declined 13.5% in 2013 to 230,587. Efforts continue to improve cruise visitor experiences and to attract additional cruise lines to the Dominica.

EXCURSIONISTS

The reduction in the number of scheduled excursions during 2013, has contributed to a 9.8% decline in same day visitor arrivals. Speedy immigration clearing and attractive land packages (similar to those designed for cruise) will create an atmosphere that would encourage more day excursions from neighbouring countries. 1,904 same day arrivals were recorded during 2013, 66.5% (1,266) were from the French West Indies

YACHTING

Dominica, particularly, the Portsmouth area, continues to grow in attractiveness to yachts, and in 2013 there was a 20.4% increase in the number of vessels clearing at Portsmouth. 2,116 vessels, carrying 8,805 passengers and crew were recorded at Portsmouth, was the highest recorded since 2005 (8,421). There was a 0.3% decline in the number of vessels clearing in Roseau. 3,970 passenger and crew arrivals were recorded, a 5.6% decline from 2012
