P: Preliminary

†: Data missing for January to May 2010, September 2011, February - June 2014

Stay Over Visitation

Preliminary arrivals for the first six months of 2014 show a **5.5% growth in stay over visitation. 39,001 stay over visitor arrivals were recorded compared to 36,956 during January to June 2013.** The number also represents growth over previous periods (2001 through 2013), including a **0.4% growth over 2006's 38,851.**

The First Quarter

Despite declines in arrivals for both February (-3.6%) and March (-2.7%), first quarter arrivals at 20,431 were 0.5% above 2013 (20,334), and 6.5% above 2006 (19,189). This growth is a result of strong performance in January, which with arrivals of 6,422 has only been surpassed by January 2008 (6,556). Student arrivals (1,433) were the primary growth area during this period. Arrivals specifically for carnival (1,046) represented 5.1% of first quarter stay over visitation.

The Second Quarter

Propelled primarily by a 42.6% growth in April's arrivals, second quarter 2014 stay over arrivals was 11.7% over 2013. Over the years there have occasions when a decline in arrivals is experienced during May there is increased arrivals during June, possibly an impact of the movement of the Pentecost Holiday. Arrivals on June 6 and 7, 2014 (716), the Friday and Saturday ahead of the Pentecost Holiday, grew 274.9% over the same dates in 2013 (191), while arrivals on May 17 and 18 (352), declined 58.0% from 2013 (839), when those dates were the Friday and Saturday ahead of Pentecost.

There appears to be a trend that visitation to Dominica, particularly from the French West Indies and some other Caribbean islands (Antigua, St. Lucia, Barbados), will spike during weekends surrounding public holidays. Because the holiday does not have to occur in Dominica as well, it creates an opportunity that can be maximised upon if packages inclusive of accommodation and tours and/or entertainment events can be created around these holidays and promoted in target source markets.

Market Performance

Through June all major source markets, except the French West Indies (-5.1%), specifically from Guadeloupe, CARICOM (-4.8%), and the United Kingdom (0%) recorded growth in arrivals.

Europe

European source markets have been leading the year to date growth. **As of June 2014, stay over visitation from Europe was 8,193, a 17.9% increase from 2013** and the highest six month figure on record. European visitors represented 21% of January to June stay over arrivals for 2014, a 2.2 percentage-point growth in market share from January to June 2013 (18.8%).

Stay over arrivals from France, at 3,106, grew 33.7% and was the largest European source market through June, representing 37.9% of European stay over visitation. Arrivals from the German speaking markets grew 6.1% to 1,395 representing 17.0% of European arrivals and 3.6% of overall stay over arrivals through June. **Germany with a 4.1% growth (957), represented 11.7% of European arrivals,** continues to grow steadily as an important source market with almost 85% of visitors staying in hotels and similar accommodations.

While the United Kingdom remains an extremely important source market for Dominica, historically visitation tends to lean towards Dominicans resident abroad and their families or friends and not as much towards growth in the accommodation sector. Through June arrivals were flat with 0% growth at

2,216, representing 27% of European arrivals. The general growth trends from the UK has not been positive in recent years and while other most other European markets have grown past targets, UK stay over arrivals are 27.9% behind the highest six month figure, 3,075 in 2007. If visitors from the UK are visiting other regional destinations, it would be important to understand what features of these other destinations appeal to the UK travelling market and determine if the market remains a high priority growth option based on what Dominica can offer.

There was a 52.1% growth in arrivals from Sweden (254) over the first six months of 2014, coupled with growth from all the other Scandinavian source markets except Norway, at 486 stay over arrivals Scandinavian stay over visitation grew 27.9% over 2013. There continues to be large number of Icelandic arrivals for business which could be attributed to the geothermal project; however over the last 4 years there has been an increase in vacation arrivals from Iceland, another benefit which could also be attributed to the project.

Some other European markets from which noticeable growth has been experienced from the first part of 2014 were The Netherlands, 87.1% to 189, Belgium, 12.2% to 120, Poland, 48% to 111, and Italy, 30.5% to 107. As a traditional market such as the UK begins to lose market share it may be necessary to look toward non-traditional options from where visitor interest appears to be growing.

The Caribbean

While stay over arrivals from **the French West Indies (8,491) represented the largest Caribbean source market at 48.4% of intra-regional arrivals** it has fallen to 2nd place overall, representing 21.6% of overall visitation for the first six months of 2014. Continuing from 2013, visitation from both markets is behind where we projected them to be, following a very positive 2012. **Six month arrivals from Martinique at 2,560 are 1.6% ahead of 2013 (2,520), however still this is still 16.9% behind 2012 (3,082).** Stay over arrivals from Guadeloupe at 5,920 showed no rebound from 2013 (6,430) declining 7.9%, which is a 10.5% decline from 2012 (6,617). Growth in arrivals from the French West Indies is necessary if Dominica is expected to meet 2015's 90,000 stay over visitation target. There must be care and revision to the approach to current and the potential visitors. Are the current campaigns and methods from both private and public sector enough and are they reach the correct growth sectors?

The business as usual approach may not be enough to grow our closest source markets which together have a combined population of 792,225 (as of January 2013), large Dominican communities (particularly Guadeloupe), and direct regular access by sea and more recently additional access by air from Guadeloupe from WINAIR. And while the Guadeloupian market has traditionally been larger, most of the visitors tend to stay in private homes (73.7% through June 2014); visitors from the Martinique are more likely to stay in paid accommodation meaning there may be more economic value to directing focus on growing interest and arrivals from that market. As of June 2014, **61.8% of visitors from Martinique stayed in paid accommodations during their trip.**

Even with the decline in arrivals, **overall regional stay over visitation to Dominica grew 1.5% over the six months.** This growth was propelled by growth in some promotable markets like St Lucia (+11.4%) and Puerto Rico (+16.6%), however there was even more movement in some markets on which promotion has little impact such as Haiti (+163.2%) and Dominican Republic (+19.1%). Amidst declines from key Caribbean source markets such as Antigua & Barbuda (-3.8%), the US Virgin Islands

(-1.3%), Barbados (-17.4), St. Maarten/St. Martin (-0.9%), and Trinidad & Tobago (-24.4%) the assessment needs to go further than schedules and cost of travel to awareness, interest, and marketing efforts. Why was there 2005 & 2006 but none now, or Why other regional destinations and not Dominica, or Is it that intra-regional travel has declined overall?

United States & Canada

To date for 2014, **stay over visitation from both the United States and Canada have grown over 2013, 6.4% and 1.1%, respectively.**

Through June, at 10,597 stay over arrivals, **the United States represents Dominica's largest source market, 27.2%.** Student arrivals were 2,373 and represented 22.4% of US visitation, while Dominican nationals residing in the US represented 18.5% (1,965). Almost fifty percent (48.1%) of US stay over visitors came from five states: New York (1,701 – 15.5%), Florida (1,346 – 12.3%), California (903 – 8.2%), Texas (718 – 6.6%), and New Jersey (601 – 5.5%). Students came primarily from the same five states: California (415), Florida (304), New York (252), Texas (185), and New Jersey (170).

A smaller, but still steady growing and significant source market, **Canadian arrivals at 1,621 represented 4.2% of six month stay over visitation.** Arrivals for study (263) only accounted for 16.2% of Canadian arrivals for the stated period. Visiting nationals (322) were 19.9% of the Canadian stay over arrivals. 61.8% (1,001) of Canadian visitors through June reside in Ontario, 9.2% (149) resided in Quebec and 8.8% in British Columbia.

With growth from both North American markets efforts must continue boost arrivals particularly in the non-student and non-national categories which are more likely to impact on the direct tourism stakeholders.

Where do they stay & Why do they come?

Over the first six months of 2014, Hotel Occupancy rate grew 30.4% over 2013 (47.7%) to 62.2%, with a high of 65.4% during April 2014. The trend of increased hotel occupancy coincides with an increase in visitors indicating they will be staying at hotels and similar type accommodations. Through June, **16,443 or 42.2% of stay over visitors indicated their accommodation of choice as Hotel, Guest House, Lodge, Bed & Breakfast, Inn, Apartment, or Cottage, representing a 12.9% increase over 2013 (14,561).** Visitors staying private homes increased 1.1% to 19,320 during the same period.

Twenty percent (7,817) of stay over arrivals during the first six months were of visiting Dominican Nationals (born in Dominica and/or Dominica passport holders but living abroad). This was a 2.5% decline in nationals visiting compared to 2013 when there were 8,016 arrivals. The United States (1,965) and Guadeloupe (1,916) were top two markets where visiting nationals were resident.

Arrivals for study through June were 2,855 or 7.3% of total visitation, an 11.5% growth over 2013. The primary markets from which students come were the United States – 2,373 (83.1%), Canada – 263 (9.2%), and Nigeria – 128 (4.5%).

Business related travel to Dominica (including meetings and conventions) was 4,306 and accounted for 11.0% of stay over arrivals. There was 0.1% decline in business arrivals. 2511 or 58.3% of 2014 business travel came from within the region, and there was a 2% decline from 2013 (2,561). Barbados (439), St. Lucia (319), Trinidad & Tobago (266), Guadeloupe (257), and Antigua (196) were the top five regional source markets for business travel. Business arrivals from the United States increased 6.4% to 926 from 2013 and accounted for 21.5% of all business arrivals. China (120), Canada (117), and the UK (116) were among the other non-regional markets for business travel to Dominica.

There was a **19.3% increase in arrivals for Honeymoon and Weddings over the six months (371)**, a positive sign for this niche market which is a focal growth area across regional destinations. 44.5% of persons coming for Honeymoon or Weddings came from the US, followed 5.7% from Germany. Dominica also experienced growth in arrivals of student groups on short exchange trips or exchanges. Through June, 466 arrivals were reported in this category, a 470% growth from 2013 (317). Guadeloupe at 192 represented 41.2% of short study arrivals and the US represented 24.9% with 116 arrivals through June.

Dominica still remains a market primarily driven by leisure travel and through June 25,395 vacation arrivals were recorded, a 4.4% growth. An additional 1,046 arrivals were specifically for carnival and 4,260 arrivals were of persons visiting friends and relatives.

Access

For 2014 **there has been growing passenger numbers at the Melville Hall Airport and through June total passenger arrivals has grown 4.2% over 2013** to 34,036. 24,988 or 73.4% of these represented stay over arrivals, a 7.6% growth over 2013 (23,229). Notable for 2014 is service that was not present during 2013 – WINAIR. Another positive from this growth is evidence that there is rebound from the cancellation of American Eagle's service to Dominica and most passengers have transition to Seaborne, LIAT, and the other carriers. After approximately two and half months of being not operational, BVI Airways resumed service from Tortola and St. Maarten at the beginning of June and Hummingbird Air has announced official start of service for July 2014 between Dominica and the US Virgin Islands and St. Lucia, creating more capacity at Dominica's Airports and options for passengers.

Stay over arrivals by ferry were 13,420 through June, a 1.8% growth from 13,188 in 2013. Arrivals via the ferry have not been as positive as in 2012 over the last six to eight months; however, we look towards the summer period for a rebound. The service offered to Dominica by L'Express Des Iles is a major player in the visitor counts, as arrivals on the ferry account for just over one-third of annual stay over visitation, primarily representing arrivals from the French West Indies, France, some other European Markets, and St. Lucia.

Same Day Visitation/Excursionists

737 same day visitors arrived in Dominica through June, a 24.1% increase over 2013, but still slightly behind January to June 2012 by 5.4% (779). In transit passengers (172) were 23.3% of same day arrivals, while arrivals for business and meetings (63) were 8.5%. **67.2% (495) of excursionists arrived for leisure.**

373 arrivals from Martinique represented 50.1% of the excursionist over the six months. 470 of the arrivals were on the ferry (63.8%).

Cruise

Through June, Dominica received 128 cruise calls which were 26 more than received over the same period in 2013, a 25.5% growth. These vessels brought **189,716 passengers, a 37.6% increase over 2013** (137,899). While these numbers are a positive sign, there is still a lot of way to go before getting back to the highs of 2009 (176) and 2010 (175).

Yacht

1,720 vessels, representing a 7.0% increase, cleared customs at Portsmouth between January and June 2014; 1,607 cleared over the same period in 2013. This was the highest six month number recorded at Portsmouth. While the number of yachts arriving at Portsmouth increased, there was a 1.0% decline passengers and crew. 6,359 passengers and crew were aboard the vessels. Declines in arrivals and visitor during April and May were the primary reason for the six month decline in visitation. As there continues to be growing interest in sailing to Dominica efforts must exist to understand their motivations to visit and how the economic benefit can be further improved. *(At time of reporting additional update on vessels clearing at Roseau was not available)*
